Swellbolt™ PK

Interference Screw System

PEEK Interference Screw System

Unlimited innovation • Future-oriented mindset

Implant - PEEK Interference Screw

Graftfix™ PK Interference Screw

- Optimized screw body design for easy implantation
- Non-cutting thread design to reduce tendon irritation
- Top-grade medical-grade PEEK material, with superior biocompatibility
- Precise injection molding process, providing secure and reliable fixation effect
- Extensive size options to meet various clinical needs

Swellbolt™ PK Sheathed Interference Screw

Innovative PEEK screw and sheath design

The application of a special injection molding process gives the PEEK screw sheath the flexibility of polypropylene (PP) while significantly enhancing its biocompatibility. The implant within the bone tunnel experiences uniform stress, enabling 360 ° comprehensive tendon-bone healing

Innovative thread design

Widened thread pitch for faster and easier insertion, and minimizes screw sheath rotation

GRAFTFIX™ PK Interference Screw

Name	Model	Specification
GraftFix™	I S - 1	Ø 6x23mm Torx Screws
GraftFix™	I S - 1	Ø 7x23mm Torx Screws
GraftFix™	I S - 1	Ø 8x23mm Torx Screws
GraftFix™	I S - 1	Ø 9x23mm Torx Screws
GraftFix™	I S - 1	Ø 10x23mm Torx Screws
GraftFix™	I S - 1	Ø 7x28mm Torx Screws
GraftFix™	I S - 1	Ø 8x28mm Torx Screws
GraftFix™	I S - 1	Ø 9x28mm Torx Screws
GraftFix™	I S - 1	Ø 10x28mm Torx Screws

SWELLBOLT™ PK Sheathed Interference Screw

Name	Model	Specification
SwellBolt™ PK with sheath	I S - 2	Ø 7x23mm Torx Screws
SwellBolt™ PK with sheath	I S - 2	Ø 8x23mm Torx Screws
SwellBolt™ PK with sheath	I S - 2	Ø 9x23mm Torx Screws
SwellBolt™ PK	I S - 2	Ø 7x25mm
SwellBolt™ PK	I S - 2	Ø 9x25mm
