

ALPS™

3 in 1 Universal Nailing System

ALPS™ 3 in 1 Universal Nailing System permits an intramedullary approach for the fixation of fractures of the proximal and shaft femur. The system consists of a series of cannulated short nails, cannulated long nails, cannulated end caps, and locking bolts and screws. The system provides two proximal locking options: Standard locking and Reconstruction locking. The aiming device provides an accurate and fast proximal and distal locking.

Features & Benefits

- Anatomical Nail Design.
- Multiple locking options for proximal locking.
- Accurate and fast mechanical aiming device for distal locking.
- A locking screw of a smooth shank configuration is much stronger for a given diameter than a fully threaded screw.
- All of the implants are available in Titanium Alloy and Stainless Steel.
- The nails and locking screws are color coded for easy identification.

Standard locking

Reconstruction locking

Indications for Use

ALPS™ 3 in 1 Universal Nailing System with standard proximal locking is indicated for fractures in the femoral shaft. Nail with reconstruction proximal locking is indicated for fractures in the femoral shaft in case of combination with femoral neck fractures, and for fractures in the subtrochanteric section additionally.
