

CANNA

Cannulated Screws System

The CANNA™ Cannulated Screw System is intended for fixation of fractures, fusions, and osteotomies of large and small bones appropriate for the size of the implants. All screws are cannulated in order to be used over a guide wire, and each screw is either partially or fully threaded using a cancellous thread form. Partially threaded screws may be used to lag one bone fragment to another, where the bone fragment is captured by the threads of the screw and pulled toward the near cortex fragment on the head side of the screw. Fully threaded screws are intended to be used to stabilize fractures with little to no compression across the fracture.

Indications for Use

■ 2.5 mm Cannulated Screws

- Intra-articular fractures of the carpals, metacarpals, tarsals and metatarsals
- Fixation of small bone fragments
- Bunionectomies and osteotomies
- Arthrodeses of small joints

■ 3.0 mm Cannulated Screws

- Fixation of fractures of the forearm, hand and foot, e.g.:
- Fractures and arthrodeses of the carpals and metacarpals
 - Fractures of the distal radius and radial head
 - Metatarsal fractures

■ 3.5 mm Cannulated Screws

- Fixation of fractures with small fragments, e.g.:
- Wrist fractures
 - Metacarpal and metatarsal fractures and fixation in metacarpal and metatarsal osteotomies
 - Tarsal fractures
 - Transcondylar humeral fractures in children

■ 4.0 mm Cannulated Screws

- Fixation of fractures with medium fragments, e.g.:
- Tarsal and metatarsal fractures and fixation in metatarsal and phalangeal osteotomies
 - Tarsometatarsal and metatarsophalangeal arthrodeses
 - Ligament fixations
 - Hallux valgus corrections

■ 4.5 mm/5.5 mm Cannulated Screws

- Fixation of fractures with medium fragments, e.g.:
- Malleolar fractures
 - Pilon tibial fractures
 - Fractures of the calcaneus and talus
 - Tibial plateau fractures
 - Carpal and tarsal arthrodeses

■ 6.5 mm/7.5 mm Cannulated Screws

- Fixation of fractures with large fragments, e.g.:
- Femoral neck fractures
 - Intercondylar femoral fractures
 - Epiphyseolysis of the femoral head
 - Ankle arthrodeses
 - Iliosacral dislocations
